PROFILE

I am a blogger, speaker, learner at heart, and love solving complex problems. I've spoken at tech conferences about various front-end topics, I develop online courses for egghead and always have personal projects I'm working on.

EXPERIENCE

Today – Mar 2017
Full Stack Software Engineer
Pluralsight

At Pluralsight I work on the admin data analytical team. We design and develop from end to end, all the necessary features admins need to understand what their users are watching. We deal will close to a billion rows of data, working in C# and React

Mar 2017 – Sep 2016
Frontend Developer
The Church of Jesus Christ of Latter Day Saints

I work alongside Back-end and QA developers to keep the lds.org website current on the latest development trends, as well as deliver information to it's worldwide users. This also includes fixing bugs and adding functionality to the site.

Sep 2016 – Dec 2015
Frontend Developer
Foxtail Marketing

I stand as the point of contact for fulfillment development tasks at Foxtail Marketing. Some of these tasks are as large as designing and building websites from scratch, to as simple as adding tracking code to a landing page. I work on fixing hacked websites, designing and

Dec 2015 – Jul 2014
Frontend Developer
Boostability

As a Developer at Boostability, I am tasked to build custom websites from PSDs. I've personally built from top to bottom over 100 websites, using semantic and responsive HTML/CSS

EDUCATION

2016 – 2013
Bachelor of Business Administration
Brigham Young University - Idaho
